

EvolveFM™

Browser-based, Easy to Use, Affordable

EvolveFM™ is a high-performance solution for sharing your facility drawings and data in real time. It delivers facility information via a simple and intuitive browser interface through your organization's intranet, corporate network, or the internet via a web server. EvolveFM includes everything you need to deploy a robust web application for viewing your intelligent facilities drawings, data, and reports.

EvolveFM is easy to learn and use - even for the most technically challenged. EvolveFM lets you control who has access to your facility drawings and information - user logins control who has access to what data and functions. There is no complicated software to learn or programming skills needed thus minimizing training requirements. And costs are controlled by containing your technology investment.

Share & Distribute Information

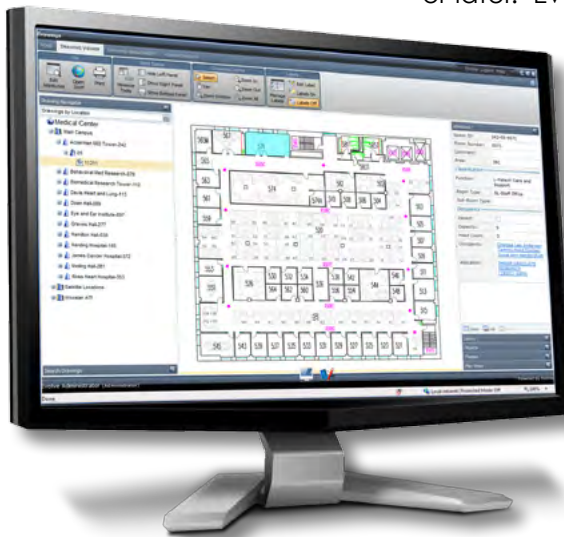

Give anyone in the organization with a web browser self-service access to the most current facilities drawings, associated data and reports - or choose to control access to designated users. EvolveFM is packed with features that will streamline the facility management information sharing process. With EvolveFM you can rest

assured that your users are always looking at the most current information.

Easy to Deploy

EvolveFM uses Microsoft IIS server software technology to connect your users to a SQL (or SQL express) database via Internet Explorer 8 or later. EvolveFM also uses Flash™

technology to provide access to drawings for zooming, panning, and theming. The seamless integration of drawings and data presented in a live browser environment is a true breakthrough for sharing your facility information in real time with all those who need it.

EvolveFM is offered via self-hosted or Software as a Service (SaaS) versions. With SaaS, you can get started right away for a low monthly fee.

Secure

With so much of your vital facility information distributed over the web, you're likely to be concerned about security. With EvolveFM you control which drawings, data, reports, and features are accessible to which users via a secure user logon system.

See next page for system requirements or visit www.cafmresources.com/system-requirements
